SUBJECT: Bureau of Highway Instructional Memorandum 2005-01
Licensed Electrician Required on Electrical Work (Supercedes CIM 1994-03)

This memorandum is to reinforce the importance of consistent practices when validating the presence of a licensed electrician on projects during the performance of electrical work.

State law requires the presence of a licensed electrician on the job site when work is being performed on state projects involving electrical wiring.

Project offices shall require the contractor to furnish the electrician's name and a copy of his/her license at the preconstruction meeting. We encourage staff to request certification from the contractor, at the preconstruction meeting, that a licensed electrician will be on site when performing electrical work.
